SWISSQUOTE WALLET · SELF-CUSTODY TRACK

Redefining Self-Custody

THE BALANCE BETWEEN INSTITUTIONAL SERVICES AND INDIVIDUAL CONTROL

By Noé GUENEGO
Juliette IBRAHIM
Mohammed BENNAS

Their keys. Swissquote's safety net

Native Bitcoin 2-of-3 multisig: any two keys move funds. Swissquote holds one key, none of the backup.

Phone key

ON THE PHONE

Generated and encrypted on the device. Signs every payment the passkey approves.

Swissquote key

IN SWISSQUOTE'S HSM

Rule-based co-signer: limits, security delays, sanctions screening. Never enough alone.

Backup key

SPLIT IN 2 SHARES · BOTH NEEDED

SHARE 1 Partner

Independent actor no. 2

Sealed for the partner. Released only after its own ID check and delay.

SHARE 2 Client

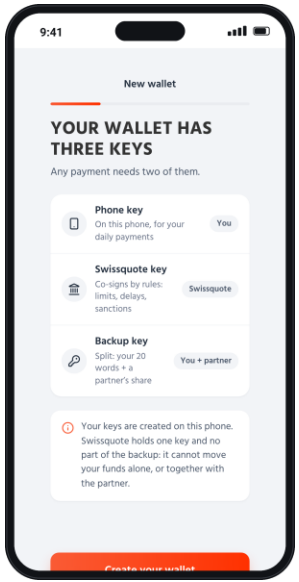

You

20 words on paper, plus an encrypted copy in your cloud.

WHO SIGNS WHEN

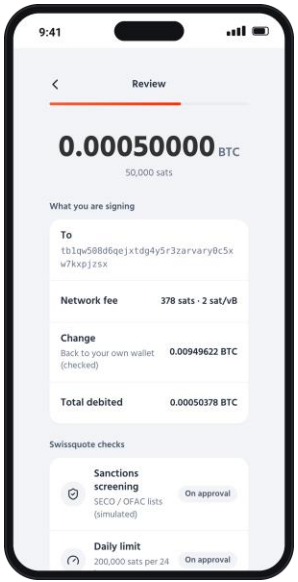

EVERYDAY	LARGE PAYMENT	LOST PHONE	SWISSQUOTE GONE
Phone + Swissquote	**Phone + Swissquote**	**Backup + Swissquote**	**Phone + Backup**
Passkey approval, instant co-signature	After a security delay and alerts; cancellable	After two ID checks and a delay, to a new wallet	No Swissquote service involved at all

Create, sign, lose it, get it back

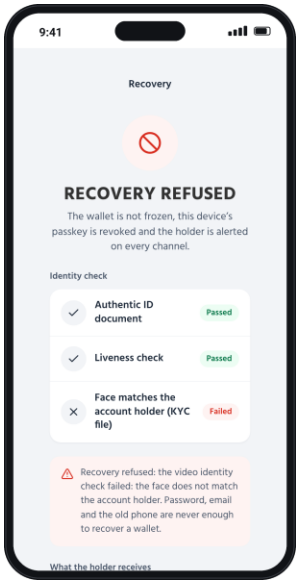

01 Create

Keys made on the phone; backup split in two

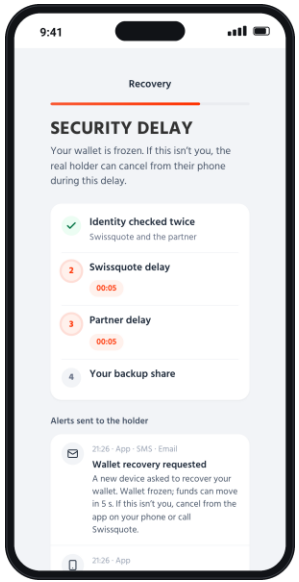

02 Sign

Passkey bound to this exact transaction

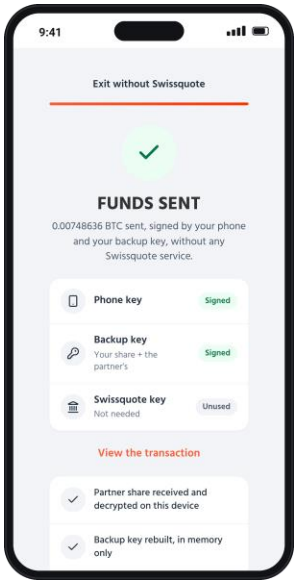

03 Thief refused

Stolen phone + email can't trigger recovery

04 Recover

Two ID checks, a delay, then the client's share

05 Exit

Swissquote offline: phone + backup move the funds

Three keys, two to move.

Your phone

Signs every payment you approve

Swissquote's rules

Limits, delays, sanctions, and it pays the fee

A backup no company can use alone

Split between you and an independent partner

Your keys. Your control.

A Swiss bank as your safety net.

THANK YOU!
